About Osteopathy
 Osteopathy specialises in the diagnosis, management treatment and prevention of musculoskeletal and other related disorders. It aims to contribute to the person's wellbeing and provide relief from pain and discomfort.
 In your first appointment a thorough case history will be taken, followed by a physical examination and treatment.
 The osteopath will examine the health of the joints, tissues and ligaments using a highly developed sense of touch (palpation).
 Your osteopath will give you an explanation of what they found and discuss a treatment plan that is suitable for you.
 Treatment is hands on and involves manipulation of the spine and joints, mobilisation, soft tissue, functional techniques, stretches, simple exercises where suitable.
 Appropriate techniques will be chosen for you and with your consent, together with simple measures to assist with your recovery and prevent recurrence of symptoms. Anyone can benefit, young and old.
 Elizabeth's background is in the fitness industry, sports and remedial massage, where she worked with athletes from many different sports. She likes to work with people from all walks of life, to educate them about their bodies and assist in their recovery and journey to wellness.

FREEDOM OF INFORMATION – PUBLICATION SCHEME

The Freedom of Information Act 2000 obliges the practice to produce a Publication Scheme. A Publication Scheme is a guide to the 'classes' of information the practice intends to routinely make available.

ZERO TOLERANCE

We strongly support the NHS policy on zero tolerance. Anyone attending the surgery who abuses the GPs, staff or other patients be it verbally, physically or in any threatening manner whatsoever, will risk removal from the practice list. In extreme cases we may summon the police to remove offenders from the practice premises.
